TCS Healthcare Technologies Announces Enhanced Interface Tools
New Updates Improve the Quality and Efficiency of ACUITY Advanced Care

Auburn, CA / PRWeb / June 4, 2015 – TCS Healthcare Technologies (TCS), a leading provider of software and clinical solutions for the care management and population health arenas, is pleased to announce new updates to the Care Enhance Review Manager Enterprise 14 and CareWebQI 7 Interface tools, both of which work with **ACUITY Advanced Care**. These tools have been certified by MCG and McKesson (Interqual), making them an essential addition to the **ACUITY** platform. Similarly, they improve the efficiency of utilization management and other care management professionals by helping them access criteria and guidelines in support of their work.

Specifically, these updates are available for use with the **ACUITY** 6.1 SP3 and **ACUITY** 7.2 systems. The interface allows demographic and admission specific information to be automatically populated to related data fields within these applications upon launching the interface. When the user completes their work in the application and returns to **ACUITY**, critical data elements automatically populate pre-defined fields within ACUITY to enhance reporting functionality.

"We are very excited to introduce these annual updates to our clients," said Debb Keller, RN, BSN, Director of Client Services at TCS. "These interfaces save several process steps in the utilization review workflow and provide for robust operational metrics."

All **ACUITY** clients who are currently using older versions of CERMe and CareWebQI are now welcome to update their CERMe to version 14 or CareWebQI to version 7 at this time. The update process will require clients to uninstall and reinstall the tools. Please email techsupport@tcshealthcare.com to request the updated tools and to ask any questions about the installation process.

For **ACUITY Advanced Care** clients who are not currently leveraging our third party interface to CERMe or CareWebQI, please email us to learn more about how these tools can help your workflow. The TCS team is happy to answer any questions about the updates and system or offer a demonstration.

To learn more about TCS and its suite of care management software products and services, contact Jeff Frater at (530) 314-7073 or jfrater@tcshealthcare.com.
