## **RegQuest™ Unveils Upgraded Website with Improved Functionality *Regulatory Compliance Resource Boasts Extensive Content, Additional Features***

**Annapolis Maryland / PRWeb / January 20, 2016** - RegQuest™, the nation's leading regulatory compliance resource that provides health plans, regulators and others with invaluable information regarding current medical management regulations and laws, is pleased to debut an upgraded website featuring improved user functionality, including an interactive map and communication forum for subscribers.

"It is an incredibly exciting time of transformation and growth for RegQuest and I'm very proud of what our team has accomplished," says RegQuest Founder, Garry Carneal, JD, MA. "As the medical management space evolves, the regulatory updates and resources offered by RegQuest will continue to be an asset for all stakeholders who require a better understanding of how to comply with state and federal laws impacting health plans and issues regarding medical management and coverage determination."

The website's revamped design highlights the services and modules that RegQuest offers with the goal of making it easier to navigate the myriad of regulations pertaining to medical management. It also includes an expansive resources section that provides regulatory updates, trend reports, an educational library of webinars and presentations and an interactive community forum where subscribers can comment on updates and interact in real time.

Current RegQuest modules include Utilization Management and External Review, which provide detailed descriptions of current state and federal regulations, including Medicare, Medicaid, ERISA and the Department of Labor Guidelines. The updated version of [www.regquest.com](http://www.regquest.com) comes as the company prepares to unveil a new Administrative Appeals and Grievance Procedure module as well as a comprehensive trend report in Q1 2016.

For subscription information or to schedule a demo of RegQuest, please click [here](#). Discounts are available for organizations that purchase more than one license and for users who subscribe to more than one module.
